「Sugaring and waxing hair removal」

- ☐ Sugaring Brazilian waxing is not permanent hair removal, and hair will grow back in about 2~10 days, although it varies from person to person.
- ☐ Apply a warm (about 35~38°C) sugar paste or wax to a delicate area and peel it off, causing the skin to turn red. In that case, cooling well will calm your skin.
- ☐ Immediately after the treatment, you may feel tingly, like a burn after a tan.
- ☐ Bleeding may occur from the hair roots because the firm hair of the pubic hair is pulled out.
- ☐ The skin of the pubic mucosa is soft, and internal bleeding may occur by pulling or peeling off.
- ☐ After removing hair from the hair root during hair removal, it may become ingrown hairs (a condition in which the skin regenerates before hair grows in the skin and the hair does not come out properly on the skin). This is a symptom that can also occur on the armpits, arms, and legs during hair removal due to the constitution.
- ☐ If it is your first time, it has been more than two months since your last treatment, or if you have had treatment at another salon and the hair roots are firmly established, it may not be possible to remove all of the hair.
- ☐ Hair less than 1 cm may not be removed. Also, after shaving and shaving the hair may not be removed even if it is more than 1 centimeter. I won't.

If you visit our salon within three days after the treatment, we will provide a follow-up. However, we do not offer refunds for the treatment fee or cover transportation costs to our salon.

I agree to the treatment because I have read the above carefully and understood and am convinced. In addition, you agree that this agreement is invalid each time, that all services are performed at your own discretion, and that the technician is not responsible for any defects. In addition, if a man ejaculates, he agrees to be charged a cleaning fee of 77,000 yen in addition to the regular treatment fee.
